Advanced Technology Group,
a Cognizant company

Job Title

Salesforce Administrator
and Implementation
Consultant

Hometown

Missoula, MT: Big Sky
High School

Education

University of Montana
(Attended, No Degree)

What did you do before your career at ATG?

Construction Foreman at a concrete company.

Why did you choose to pursue a career in technology?

I wanted to take a gamble on myself. At the time, I was unhappy with my career path and needed to make a change. I attended one of ATG's weekly happy hours with a friend who worked for ATG. This happy hour was ATG's last to be held in their downtown location (the original office location for ATG in Missoula, MT). After hearing stories shared by ATG team members and meeting with some of ATG's leadership, I knew it was a team I wanted to be part of.

Having a non-traditional background, I took a leap and applied to the 12-week training program. This program provided me with consulting and technology fundamentals that I needed to be successful in the technology industry.

What advice would you give yourself starting your career?

Keep an open mind and be willing to adapt to change. Explore the different roles of this industry to see what really fits well for you. Be willing to work as a team, and never be afraid to ask for help. Utilize the resources around you, visualize your goals and never give up.
