Implementation  
Consultant

## Hometown

Broadus, MT: Powder  
River Country District High  
School (Let'R Buck!)

## Education

The University of Montana;  
Psychology

## What do you do?

Currently, I am an Implementation Consultant. I am responsible for configuring, consulting, and working with a large telecommunications company on a digital transformation for their automated client services.

## What did you do before your career at ATG?

Customer Service, Personal Assistant

## Why did you choose to pursue a career in technology?

I chose to pursue a career in technology, specifically ATG/Cognizant, to give myself greater opportunities. Professionally, I wanted my career to have purpose. I wanted stability, support, and continued growth opportunities. Personally, I wanted to be able to begin building my life in Missoula and to have the financial stability to do so. All of which I saw possible with ATG/Cognizant, through the 12-week Training Program.

## What advice would you give yourself starting your career?

A bit of advice that I would give myself, knowing what I know now, would be to allow myself to be vulnerable (sooner, rather than later). To ask the rookie questions, communicate when you don't understand, and remember that everyone starts at the beginning. Vulnerability, patience, and grace have a magical way of presenting endless opportunities.
