

JON QUINN

Advanced Technology Group,
a Cognizant company

Job Title

Business Analyst

Hometown

Butte, MT: Butte High
School

Education

The University of Montana;
B.A. Political Science

What do you do?

My primary role has been as a Business Analyst on various types of Salesforce implementations.

What did you do before your career at ATG?

A wide variety of fields and roles! 12 years in the Army National Guard with one deployment to Afghanistan. I also worked in retail and food service, sales rep for a brewery, sold cars, and briefly worked as a police officer.

Why did you choose to pursue a career in technology?

I wanted something that was a career rather than just a job. Something with upward mobility and growth opportunities, good pay, and benefits. That can be tough to find in MT. I joined ATG/Cognizant because it seemed like a great opportunity to get his foot in the door in an industry where I had no experience, but could pick up a skill set that was very in demand.

What advice would you give yourself starting your career?

I would tell myself to set goals and start working to achieve them. I spent a long time working jobs I was getting no fulfillment from but taking no action to make progress. In hindsight, everything worked out for the best, but I could have started down the right path a lot sooner than I did!
